Allowable Subject Matter

1. Claims 1, 3-12, 14-18, 20-22, and 24-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art does not anticipate, nor does it suggest, the combination as now claimed in the claims. Specifically, claim 1 recites a combination of elements, including specifics of "a moving body estimation sub-system that decides whether the moving body is a predetermined monitored subject based on the speed detected by the speed detection sub-system and the size detected by the scale detection sub-system, the moving body estimation sub-system having an actual scale estimation sub-system that determines an estimated actual size of the moving body based on the speed detected by the speed detection sub-system and the size detected by the scale detection sub-system, the moving body estimation sub-system deciding whether the moving body is the predetermined monitored subject based on the estimated actual size of the moving body," that, in combination with the other claim limitations. Regarding claim 11, "a class estimation sub-system that checks the position detected by the position detection sub-system and the size detected by the scale detection sub-system against the correlation relationships stored in the correlation relationship storage sub-system to estimate the class of the moving body and decides whether it is the predetermined monitored subject based on the estimated class of the moving body," that, in combination with the other claim limitations. Regarding claim 17, "comparing the detected speed in the optical image plane and the size detected

in the optical image plane against the stored correlation relationships to estimate a class for the moving body," that, in combination with the other claim limitations. Regarding claim 22, "determining an estimated actual size of the moving body based on the position detected in the optical image plane and the size detected in the optical image plane," that, in combination with the other claim limitations.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
